21 [Cooperative visual manipulation of music notation](#)

P. Bellini, P. Nesi, M. B. Spinu

September 2002 **Transactions on Computer-Human Interaction (TOCHI)**

Publisher: ACM [Request Permissions](#)

Full text available: [Pdf](#) (3.42 MB) **Additional Information:** [full citation](#), [abstract](#), [reference terms](#)

Bibliometrics: Downloads (6 Weeks): 13, Downloads (12 Months): 108, Citations

As computer technologies and their potential emerging applications spread, needs have been detected for computer-based applications of music; computer notation editing both in orchestras and music schools is one of them. The

Keywords: Collaboration of music notation editing, additional command collaborative systems, computer-supported cooperative work, consistent cooperative music, distributed music, electronic lectern, neutral version user interface management systems

22 [Enhancing byte-level network intrusion detection signatures with context](#)

Robin Sommer, Vern Paxson

October 2003 **CCS '03: Proceedings of the 10th ACM conference on Computer communications security**

Publisher: ACM [Request Permissions](#)

Full text available: [Pdf](#) (217.88 KB) **Additional Information:** [full citation](#), [abstract](#), [reference terms](#)

Bibliometrics: Downloads (6 Weeks): 22, Downloads (12 Months): 174, Citations

Many network intrusion detection systems (NIDS) use byte sequences to detect malicious activity. While being highly efficient, they tend to suffer from a false-positive rate. We develop the concept of *contextual signatures* as

Keywords: bro, evaluation, network intrusion detection, pattern match signatures, snort

23 [Structuring internet media streams with cueing protocols](#)

Jack Brassil, Henning Schulzrinne

August 2002 **IEEE/ACM Transactions on Networking (TON)**, Volume 10 |

Publisher: IEEE Press

Full text available:  Pdf (282.39 KB) Additional Information: full citation, abstract, referer terms

Bibliometrics: Downloads (6 Weeks): 10, Downloads (12 Months): 85, Citation

We propose a new, media-independent protocol for including program t and identity information in Internet media streams. The protocol uses s messages called *cues* to indicate events whose timing is significant to r

Keywords: content delivery networks, multimedia signaling, real-time (RTP)

24 Improving the granularity of access control for Windows 2000

 Michael M. Swift, Anne Hopkins, Peter Brundrett, Cliff Van Dyke, Praerit Ga
Ohan, Mario Goertzel, Gregory Jensenworth

November 2002 **Transactions on Information and System Security (TI**
Issue 4

Publisher: ACM 

Full text available:  Pdf (447.78 KB) Additional Information: full citation, abstract, referer terms, review

Bibliometrics: Downloads (6 Weeks): 9, Downloads (12 Months): 125, Citation

This article presents the mechanisms in Windows 2000 that enable fine-centrally managed access control for both operating system component applications. These features were added during the transition from Winc support the ...

Keywords: Access control lists, Microsoft Windows 2000, Windows NT,

25 The <bigwig> project

 Claus Brabrand, Anders Møller, Michael J. Schwartzbach

May 2002 **Transactions on Internet Technology (TOIT)** , Volume 2 Issue 2

Publisher: ACM 

Full text available:  Pdf (586.33 KB) Additional Information: full citation, abstract, referer terms

Bibliometrics: Downloads (6 Weeks): 8, Downloads (12 Months): 70, Citation

We present the results of the <bigwig> project, which aims to design a high-level domain-specific language for programming interactive Web s fundamental aspect of the development of the World Wide Web during t

Keywords: Interactive Web services, program analysis

26 Designing a human-centered, multimodal GIS interface to support er management

 Ingmar Rauscheri, Pyush Agrawal, Rajeev Sharma, Sven Fuhrmann, Isaac MacEachren

November 2002 **GIS '02: Proceedings of the 10th ACM international sympos: in geographic information systems**

Publisher: ACM  [Request Permissions](#)

Full text available:  Pdf (481.94 KB) [Additional Information: full citation, abstract, referer terms](#)

Bibliometrics: Downloads (6 Weeks): 18, Downloads (12 Months): 212, Citations

Geospatial information is critical to effective, collaborative decision-making in emergency management situations; however conventional GIS are not : user access and high-level abstract queries. Currently, decision makers

Keywords: GIS, collaborative work, human-centered design, interactive multimodal human-computer-interface, speech and gesture recognition

27 [Law-governed interaction: a coordination and control mechanism for distributed systems](#)

 Natraiy H. Minsky, Victoria Ungureanu

July 2000 **Transactions on Software Engineering and Methodology** (1 Issue 3)

Publisher: ACM  [Request Permissions](#)

Full text available:  Pdf (792.05 KB) [Additional Information: full citation, abstract, referer terms](#)

Bibliometrics: Downloads (6 Weeks): 4, Downloads (12 Months): 57, Citations

Software technology is undergoing a transition from monolithic systems according to a single overall design, into conglomerates of semiautonomous heterogeneous, and independently designed subsystems, constructed a different ...

Keywords: coordination of heterogeneous agents, policy enforcement,

28 [Supporting structured credentials and sensitive policies through interaction strategies for automated trust negotiation](#)

 Ting Yu, Marianne Winslett, Kent E. Seamons

February 2003 **Transactions on Information and System Security (TIS)** (1 Issue 1)

Publisher: ACM  [Request Permissions](#)

Full text available:  Pdf (507.29 KB) [Additional Information: full citation, abstract, referer terms, review](#)

Bibliometrics: Downloads (6 Weeks): 13, Downloads (12 Months): 121, Citations

Business and military partners, companies and their customers, and other cooperating parties may have a compelling need to conduct sensitive interaction in such as accessing each other's local services and other local resources.

Keywords: Automated trust negotiation, access control, digital credential interoperable strategies

29 [ObjectGlobe: Ubiquitous query processing on the Internet](#)

R. Braumandl, M. Keidl, A. Kemper, D. Kossmann, A. Krütz, S. Seitzman, August 2001 **The VLDB Journal — The International Journal on Very Large Databases**

Bases, Volume 10 Issue 1

Publisher: Springer-Verlag New York, Inc.

Full text available:  Pdf (251.44 KB) Additional Information: [full citation](#), [abstract](#), [reference terms](#)

Bibliometrics: Downloads (6 Weeks): 6, Downloads (12 Months): 74, Citation

We present the design of ObjectGlobe, a distributed and open query processing Internet data sources. Today, data is published on the Internet via Web have, if at all, very localized query processing capabilities. The goal of t

Keywords: Cycle-, function- and data provider, Distributed query processing systems, Privacy, Quality of service, Query optimization, Security
